39. Any other feedback you would like to provide?

- The vibration when an object is grabbable lasts way too long. I touched my hand controller to it and it vibrated long after i stopped making contact with it.
- The box i'm grabbing won't shut up and i can't figure out which sound was the one i grabbed and the one in the environment. In fact, because of proximity, the one i grabbed was often louder.
- The box fell through the floor and i simply could not reach it
- I needed to physically sit forward from my chair or else I couldn't reach the red boxes

39. Any other feedback you would like to provide?

I got so distracted with locating the audio that I forgot to move. I did not know when I grabbed one of the objects and if I drop it. The game ended and I had no idea what I did what happened. I think the audio choices were on spot, a bit louder for my taste. the lack of visual feedback was disorienting but exciting as a problem solving opportunity. I'd prefer having feedback confirming that I grabbed the objects and merged them.
